Profile

Data Analyst with 4 years of experience delivering actionable insights that drive multimillion-dollar impact. Expertise in SQL, Python, R, Tableau, and Power BI. Strong experience in building executive dashboards, automating reporting (60–80% time savings), uncovering \$1.8M+ in cost savings, and leading end-to-end analytics in Agile environments. Working experience in turning complex data into clear, high-impact recommendations for C-suite stakeholders.

Skills

Reporting Tools:

MS Project, MS Office, MS SharePoint, MS Visio, MS Word, MS PowerPoint, MS Excel

Visualization Tools:

Tableau, Power BI

Databases:

MySQL, MS SQL Server, PostgreSQL, NoSQL

Programming Languages:

SQL, R, Python

Cloud:

AWS, Azure, Snowflake, Databricks

Analysis:

Cost/Benefit Analysis, GAP Analysis, Risk Analysis, Impact Analysis, SWOT Analysis, Business Impact Analysis, Pivot, Regression Analysis, Decision Making

Version Control:

Git, Gitlab

Tracking and other Tools:

Jira, UAT, CRM, SAP ERP, KPIs

Methodologies:

SDLC, Agile/Scrum, Waterfall

Professional Experience

Data Analyst, Deloitte

09/2023 – Present

- Designed and maintained interactive dashboards in Tableau and Power BI for executive leadership, reducing monthly reporting time by 65% and enabling real-time KPI monitoring across sales, finance, and operations teams.
- Wrote complex SQL queries and developed Python/R scripts for data extraction, cleaning, and automation, processing over 10 million records monthly from MySQL, PostgreSQL, and AWS Redshift.
- Built predictive models using scikit-learn (regression, classification) to forecast demand and detect operational inefficiencies, improving forecast accuracy by 22%.
- Conducted statistical analysis (regression, hypothesis testing, cohort analysis) that identified \$1.8M in annual cost-saving opportunities through supply-chain optimization.
- Led GAP, SWOT, Cost/Benefit, and Business Impact analyses for multiple enterprise projects, presenting findings to C-level stakeholders using PowerPoint and Visio process flows.
- Collaborated with product and engineering teams in Agile/Scrum ceremonies using Jira; authored user stories, managed backlog, and coordinated UAT cycles.
- Developed and deployed automated ETL pipelines on AWS (S3, Glue, Lambda) and Azure Data Factory, improving data freshness from daily to near real-time.

Junior Data Analyst, DXC Technology

03/2021 – 08/2023

- Developed and scheduled 30+ recurring reports and dashboards in Power BI and Excel (Power Query, DAX, PivotTables) for risk, compliance, and fraud detection teams.
- Trained ML models (XGBoost and TensorFlow) for anomaly detection and churn-risk scoring, supporting data-driven decision-making across business units.
- Performed risk and impact analysis for system migrations (SAP ERP upgrade), documenting findings in SharePoint and presenting recommendations that prevented potential \$400K in compliance penalties.
- Automated monthly regulatory reporting using Python (pandas, openpyxl) and R, cutting manual effort from 3 days to under 2 hours.
- Supported CRM (Salesforce) data integrity initiatives by writing SQL scripts to identify and resolve duplicate records and data quality issues.

Business Operations Manager, Nitrocare EU

04/2017 – 12/2020

- Managed the showroom for one of Turkey's top 500 companies in medical furniture, patient beds, and hospital supplies.
- Oversaw production planning and product demand forecasting, contributing to early data-driven decision practices.
- Performed sales and logistics analysis to ensure cost-effective project execution.
- Designed and refreshed showroom layouts, while tracking sales performance metrics across product categories.
- Introduced performance reports and data summaries for the CEO and CFO, creating a foundation for later analytics work.
- Skills gained: Retail Analytics, Production Forecasting, Store Management, Excel reporting.

Education

Bachelor's degree in computer engineering, Atilim University

09/2004 – 06/2011
